EXAMINER'S AMENDMENT

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 18 July 2006, Mr. Michael N. Mercanti requested an extension of time for 2 MONTH(S) and authorized the Director to charge Deposit Account No. 02-2275 the required fee of \$450.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 6-9.

The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor fairly suggests the instant complexing of glycyrrhizin with famotidine (such that the composition is substantially free of uncomplexed famotidine), leading to increased solubility of famotidine. The closest prior art is the Zyck, et. al. (U.S. Patent No. 6,541,048) reference, which teaches use of glycyrrhizin in combination with famotidine (see col. 7, line 52). The reference does not teach complexing of glycyrrhizin with famotidine such that the composition is substantially free of uncomplexed famotidine; nor does it teach increased solubility of famotidine as a result of complexing with glycyrrhizin.

Art Unit: 1615

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
